

Customer Interaction Review

CFPB public domain — internal O2 track; substrate S2; complaint rubric calibration PENDING (pilot = shakedown)

The one thing to know

1745 / 2500 complaints described losing money or access without remedy

distinct interactions matching ≥ 1 member pattern (union over hits), interaction-unit only · resolve with `cix query <run_dir> --metric unremediated_loss_rate`

What's working

- **Issues the company did fix** — 87 (3% of eligible). The healthy counter-pattern — the narrative acknowledges the problem was ultimately corrected.

Where the leverage is

#	What's happening	How often	Effort / payoff	Est. value / yr	Monday action
---	------------------	-----------	-----------------	-----------------	---------------

Watch list — real, no off-the-shelf remedy yet

- **Lockouts with no recovery path** — 173 interaction. Customers locked out of the account and unable to get back in through the provider's own process.
- **Disputed fees** — 316 interaction. Fees or charges customers say were incorrect, undisclosed, or wrongly applied.
- **Fraud victims turned away** — 961 interaction. Scam and fraud victims whose claims were denied or redirected instead of resolved.
- **Frozen funds and blocked accounts** — 541 interaction. Customers cut off from their own money by a provider-side freeze or hold.
- **Payments not credited** — 217 interaction. Payments made but not applied — wrong account, wrong balance, or lost in processing.
- **Refunds refused** — 984 interaction. Customers who asked for their money back for a concrete loss and did not get it.

- **Repeat complaints on unresolved issues** — 653 interaction. The same issue raised before and still unresolved — the first response should have prevented this contact.
- **Support that doesn't answer** — 615 interaction. No human reachable, no reply, or only templated answers that don't address the issue.

Why you can trust these numbers

82% of 2500 eligible interactions read (453 residual). Drops: 34 candidate claims, 0 quote drops, 0 stat drops.
